Growing Together

PASCO K-8 • SCHOOL IMPROVEMENT AT A GLANCE

2026–2027 | A Family Guide

Our focus is simple: strong teaching, confident learners, and steady growth for every student.

OUR GOALS

Reading: Increase the percentage of students meeting grade-level expectations by 10 percentage points.

Math: Work toward at least 60% of students meeting expectations.

Science: Improve achievement by 10%.

Student support: Work toward at least 50% proficiency for students with disabilities and our Black and Hispanic student groups, while addressing individual learning needs.

HOW WE CHECK PROGRESS

Teachers review classroom work, short assessments, i-Ready results, and state assessment data. Teams use this information to adjust instruction and check whether support is working.

WHAT YOUR CHILD WILL EXPERIENCE

Clear learning goals and success criteria so students know what they are learning and what success looks like.

Teacher modeling, guided practice, and opportunities to work independently.

Daily reading, purposeful writing, discussion, and problem-solving across subjects.

Hands-on science and explanations supported by evidence.

Small-group instruction, extra support, and appropriate challenge based on student needs.

Clear routines, positive behavior supports, and regular feedback.

HOW FAMILIES CAN HELP

Make time for reading every day and talk about what your child reads.

Ask: What are you learning? How will you know you are successful? What is your next step?

Support regular attendance and consistent home routines.

Review progress with your child and stay in touch with teachers.

Participate in family learning events and ask about available support.

Together, we help our Pirates grow as readers, thinkers, and independent learners.
